### Career Objective

The ultimate IT professional, balanced and capable in all the aspects of a full life-cycle development at the highest industry level in Senior Developer or Consultant roles

### Profile

- Strong IT professional with about twenty-eight years of experience working on various stages of a project's full life cycle development, such as analysis, design and development, maintenance or customer support
- Balanced skill-set with considerable database background and more than capable of front-end, back-end, web, reporting or batch development. Versatile, very quick to grasp new concepts and technologies. Highly skilled at using the Internet for any work-related task
- Highly reliable, routinely entrusted to perform project-critical tasks. Will go an extra mile to get things done, while keeping everybody involved well informed at all times
- Fully independent and team-spirit oriented at the same time, with friendly and supportive attitude well accepted by the colleagues and clients alike. Always with positive outlook and thriving on diversity
- A strong character driven by values and principles, well balanced with above-average versatility and self-determination. Out of the box thinker, systematically considering both sides and looking for the big picture
- Always with initiative to research and improve, whether it is IT skills, general/academic knowledge or physical capabilities
